IBS00174-02 - Headset Peltor MTII/MTIII - Military

The MIL-SPEC connector currently used for Ibsophone will be replaced with connector with a different colour. The change of connectors will take effect in the near future, due to stock and delivery time of new connectors.

Reason for the change is due to new information regarding that the current MIL-SPEC connector does not fulfil the RoHS requirements.

The new MIL-SPEC connectors is fully compatible with the current connectors.
